PROFESSIONAL SUMMARY

An analytical and tech-forward Integrated Program in Management (IPM) student at IIM Jammu, specializing at the intersection of Corporate Finance, Data Analytics, and Software Engineering. Combines rigorous management frameworks with advanced computational skills, verified by elite technical certifications from HarvardX. Proven track record of contributing to open-source software and building complex financial models. Seeking a challenging corporate finance or fintech internship to leverage data-driven financial decision-making.

EDUCATION

Integrated Program in Management (IPM) – BBA + MBA | Indian Institute of Management (IIM), Jammu 2024 – 2029 (Expected)

Current: Year 2 / Semester II

- Key Coursework: Critical Thinking & Problem Solving (CTPS), Financial Accounting, Corporate Finance, Microeconomics, Business Statistics, Business Strategy.

TECHNICAL CERTIFICATIONS

- CS50x: Introduction to Computer Science — HarvardX (Harvard University): Intensive foundational course covering C, Python, SQL, algorithms, data structures, and software engineering principles.
- CS50: Introduction to Cybersecurity — HarvardX (Harvard University): Covered specialized security frameworks, vulnerability analysis, cryptography, secure coding practices, and risk mitigation strategies in digital architecture.

TECHNICAL & FINANCIAL CORE SKILLS

Financial Analytics: Capital Budgeting (NPV, IRR, Payback Period), Master Budgeting, Financial Forecasting, Sensitivity Analysis, Ratio Analysis

Programming & Systems: Python (Pandas, NumPy), SQL, C, HTML5, CSS3, Version Control (Git/GitHub), Linux Mint environment

Data Visualization: Microsoft Excel (Advanced Modeling, Dynamic Ranges), Power BI

Soft Skills: Structural Critical Thinking, Team Leadership, Cross-functional Communication

FINANCIAL MODELING & SIMULATION PROJECTS

Enterprise Master Budget Simulation Engine | Independent / Academic Project

- Engineered a dynamic, multi-departmental Master Budget template in Excel utilizing advanced logical formulas and reusable data structures.
- Integrated sales forecasting, production budgeting, direct materials/labor schedules, and cash flow projections into a unified, boardroom-ready dashboard.
- Designed a dynamic scalability template to allow seamless adjustments for shifting market demands.

Corporate Capital Budgeting Allocation Analyst | Financial Analysis Project

- Developed an investment evaluation model analyzing multi-million rupee hypothetical corporate capital deployments.
- Calculated Weighted Average Cost of Capital (WACC), Net Present Value (NPV), and Internal Rate of Return (IRR) across mutually exclusive projects.
- Executed scenario analysis to stress-test project viability against fluctuating inflation rates and cost overruns.

OPEN-SOURCE & TECHNICAL EXPERIENCE

Open-Source Software Contributor | *GitHub Platform*

- Actively participated in open-source development ecosystems by auditing code repositories, documenting workflows, and submitting pull requests for optimization.
- Managed local development builds using Git branching strategies to ensure clean code merges.

Interactive Web Portfolio Architecture | *Personal / Academic Capstone*

- Engineered a responsive, semantic HTML5/CSS3 portfolio site mirroring enterprise aesthetics (inspired by Stripe and Bloomberg) to present analytics case studies.
- Leveraged CSS Grid and Flexbox for mobile-responsive layout execution without reliance on heavy external frameworks.

HONORS & LEADERSHIP

- Participant: Various corporate case competitions and hackathons testing quantitative problem-solving under tight deadlines.
